Name of the Activity: Chart Preparation

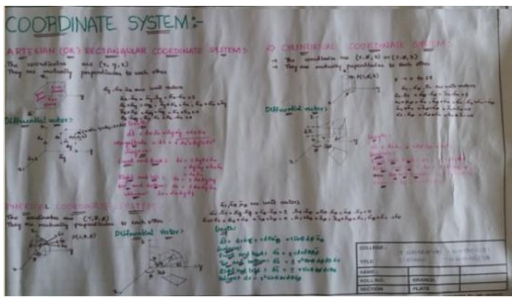

Subject Name: EMF
Faculty Name: Dr. Ch Sunil kumar
Topic: Vector analysis and coordinate systems
Date of Conduction: 15th July 2017
Class / Year / Semester: II EEE / 2017-18 / I Sem

Brief Write-up

Charts and diagrams are especially helpful, as they enable students to see ideas visually laid out in an organized way. Also, visual tools can help the students process content and to make connections more easily. Many students are visual learners, so they understand and retain information better when the concepts are associated with images. In this activity, the students were instructed to make chart on the topic 'Vector analysis and coordinate systems' For this, students were grouped in to various teams and instructed them to prepare the charts for the respective subject area.

EMF
Activity: Chart Preparation
Topic: Vector analysis and coordinate systems – Date: 15th July 2017

No. of Students: 72

Preparation / Prerequisites:
Announced the topic in the class on 15st July 2017. Students were asked to come prepared with proper material / information. Basic information provided in the class.

Rules Executed

- Formed the teams randomly and given 10 minutes time to discuss among team members.
- Do not repeat the text of your presentation word-for-word on the visual.
- Keep statements simple and to the point, using key words and phrases.

- Use only essential information which supports your statements; for example, do not project all the statistics you are using. Pick only the key ones.
- Experiment with a variety of layouts to determine the most effective ones.

Faculty Name: Ms.K.Amritha

Topic: Basics of Electrical Engineering

Date of Conduction: 18th July 2017

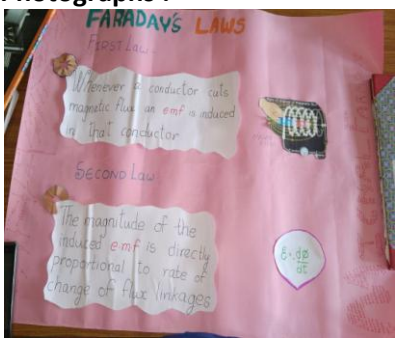

Class / Year / Semester: II ECE - A / 2017-18 / I Sem

Write-up

Electrical Technology is a subject for ECE students which covers the important concepts of Electrical machines. The subject started with the concept of DC machines. Immediately after the introduction of the subject, students were asked to prepare a chart indicating some commonly used elements in Electrical Engineering and the symbol for representing them.

Students were divided into groups and prepared the charts marvelously representing each element.

Name of the Activity: Mind-Map

Subject Name: Power Systems-II
Faculty Name: G. Sandeep
Topic: Classification of Transmission Lines
Date of Conduction: 5th August 2017
Class / Year / Semester: III EEE / 2017-18 / I Sem

Brief Write-up

A mind map is a graphical way to represent ideas and concepts. It is a visual thinking tool that helps structuring information, helping you to better analyze, comprehend, synthesize, recall and generate new ideas. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added. Major ideas are connected directly to the central concept, and other ideas branch out from those.In this activity, the students were instructed to make the mind-map on the title '' Classification of Transmission Lines" under the subject "Power Systems-II". For this, students were grouped in to various teams and instructed them to prepare the mind-map on charts for the respective subject area.

Photographs

Activity: Mind-Map
Topic: Classification of Transmission Lines**– Date:** 5th August 2017
No. of Teams: 6

Preparation / Prerequisites:
Announced the topic in the class on 31st July 2017. Students were asked to come prepared with proper material / information. Basic information provided in the class.

Rules Executed

- Start in the center with an image of the topic.
- Use images, symbols, codes, and dimensions throughout your mind-map to make it rich and pictorial.

- Select key words and print using upper or lower case letters.
- The lines should be connected, starting from the central image. The lines become thinner as they radiate out from the center.
- Use at least 3 colors. Using multiple colors throughout the mind-map is beneficial for visual effect and also for encoding or grouping.
- Use emphasis and show associations in your mind-map.
- Keep the mind-map clear by using radial hierarchy or outlines to embrace your branches.

Faculty Name: Mr. M Rupesh
Topic: Magnetic Circuits, Network Topology
Date of Conduction: 7th, 14th July 2017
Class / Year / Semester: II ECE / 2017-18 / I Sem

Brief Write-up

Mind Mapping is a useful technique that helps to learn more effectively, improves the way that we record information, and supports and enhances creative problem solving. By using Mind Maps, one can quickly identify and understand the structure of a subject. Here, we can see the way that pieces of information fit together, as well as recording the raw facts contained in normal notes. Mind Maps also help us to remember information, as they hold it in a format that your mind finds easy to recall and quick to review. In this activity, the students were instructed to make the mind-map on the title 'Magnetic Circuits 'in Network Analysis. For this, students were grouped in to various teams and instructed them to prepare the mind-map on charts for the respective subject area.

Brief Write-up

Practical approach is necessary in engineering to get awareness on power electronics concepts and their applications in engineering. The power supplies and conversions are shown to the students which are used in controlled robots and other electronics designs as shown in figure 1 and figure 2. In addition to this topic dc-dc converters and dc-ac converters are used in solar applications. In this regard solar integration and monitoring is carried out to students as shown in figure 3 and figure 4.

Department of Electrical and Electronics Engineering
BVRIT HYDERABAD College of Engineering for Women

Name of the Activity: Think – Pair - Share

Subject Name: Network Theory
Faculty Name: Guruswamy Revana
Topic: DC and AC Transients
Date of Conduction: 19.09. 2017
Class / Year / Semester: II EEE / 2017-18 / I Sem

Brief Write-up

After having discussion with the students, it has been noticed that the students felt difficulty in the topic of DC and AC Transients. Hence an activity of Think- Pair – Share is being conducted to them. This activity makes them to learn from their peers and clear the doubts. Time is allotted to the students to think about the topic, discuss about it and then share it to the class of the concepts they had learnt. This activity is being monitored by the faculty to correct them when the students do mistakes

Photographs

Network Theory

Activity: Technical Dumb Charades

Topic: DC and AC Transients

Teams size : 2 or 3 students

Preparation / Prerequisites:

Students have to know the concepts of DC and AC Transients. They should know the mathematical concepts in the topic and also should be able to analyze it in both time and Laplace domain. The students should have the basic concepts of mathematics such as Integration, Differentiation and Partial Fractions.

Rules Executed

- Topics or problems are allotted to student team on DC and AC Transients.
- Time has been allotted to them of around 3 minutes to think by themselves about the assigned problem.
- After that the students have to pair with their team and discuss about the problem or topic for about another 3 minutes.
- Within this time, the team has to come to conclusion about topic or proble.
- Now randomly, teams are called on to the dais to share their views about the topic or the methodology employed to solve the problem.
