Name of the Activity: Chart Preparation

Subject Name: Power Quality
Faculty Name: Ms.K.Bhavya
Topic: Power Quality Issues
Date of Conduction: 15th November 2019
Class / Year / Semester: IV EEE / 2019-20 / I Sem

Brief Write-up (Not exceeding 200 Words)

The Charts and diagrams are especially helpful, as they enable students to see ideas visually laid out in an organized way. Many students are visual learners, so they understand and retain information better when the concepts are associated with images. In this activity, the students were instructed to make chart on the title 'Power Quality issues' under the subject 'Power Quality'. For this, students were grouped in to a team of 3 and instructed them to prepare the charts for the respective given subject area.

Preparation / Prerequisites:
Announced the topic in the class on 10th November 2019. Students were asked to come prepared with proper material / information. Basic information provided in the class.

Rules Executed

- Formed the teams randomly and given 10 minutes time to discuss among team members.
- Do not repeat the text of your presentation word-for-word on the visual.
- Keep statements simple and to the point, using key words and phrases.
- Use only essential information which supports your statements; for example, do not project all the statistics you are using. Pick only the key ones.
- Experiment with a variety of layouts to determine the most effective ones.

Department of Electrical and Electronics Engineering
BVRIT HYDERABAD College of Engineering for Women

Name of the Activity: Quiz with Kahoot

Subject Name: Basic Electrical Engineering

Faculty Name: Ms.K.Amritha

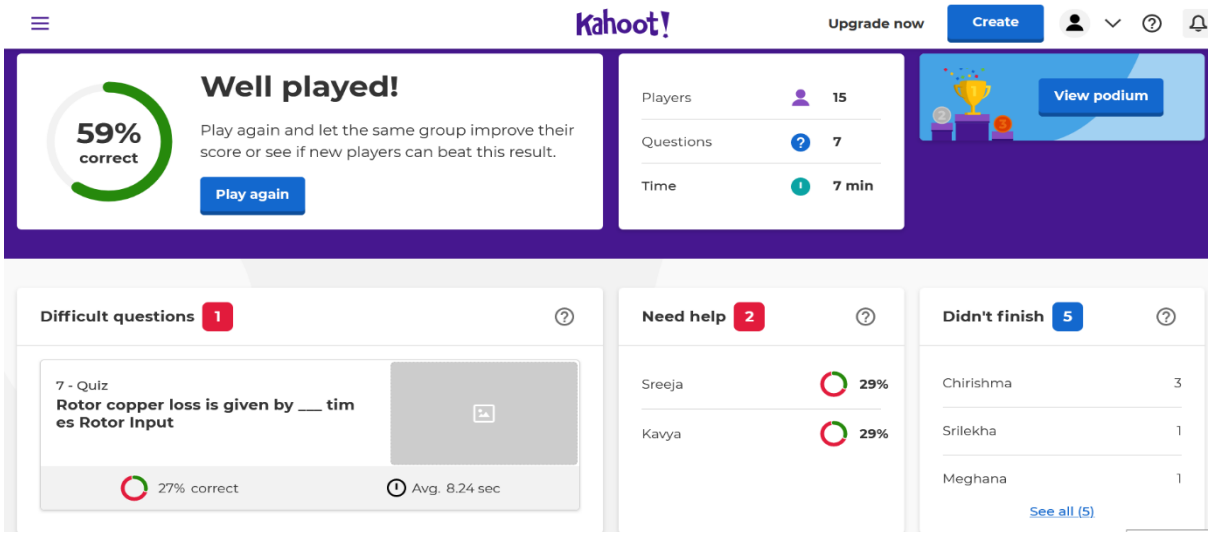

Topic: DC motor

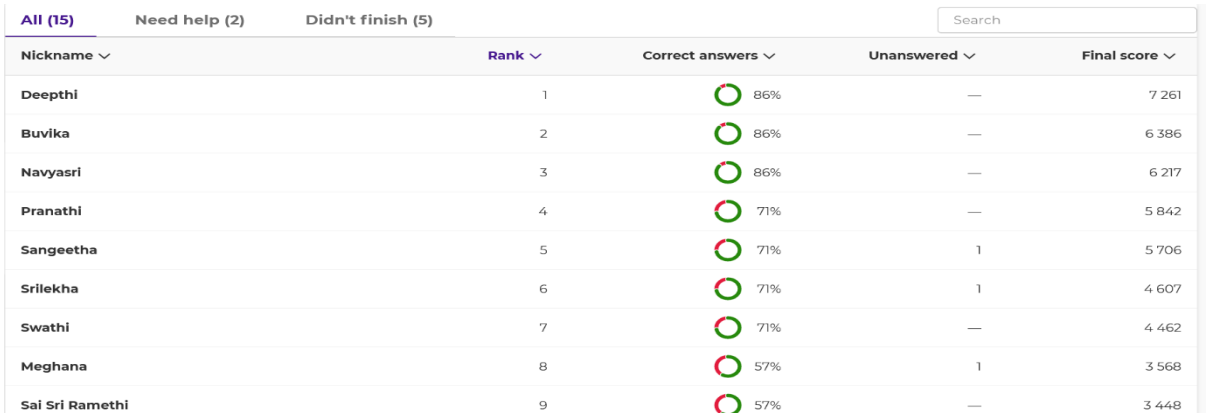

Date of Conduction: 22nd May 2020

Class / Year / Semester: I ECE - B / 2019-20 / II Sem

Write-up

Kahoot is a game – based Learning platform where the students attend to the assessment on the topic covered, in the form of a quiz. The quiz is prepared by the teacher and the students are required to attend the questions in a fixed time frame. The questions are projected on the screen. Students have to select an option in the answer section within the set time frame. The reward points based on the time taken by a student to answer, trigger the interest in the student mind. By this activity, Students can assess the quickness of their mind and body in responding to a question.

Department of Electrical and Electronics Engineering

Name of the Activity: Technical Cross Word

Subject Name: Basic Electrical Engineering
Faculty Name: Ms. P. Subhashitha
Topic: Induction Motor
Date of Conduction: 3rd December 2019
Class / Year / Semester: I IT - B / 2019-2020 / I Sem

This activity is very useful for remember and understand level of learning. Students start searching various learning resources to frame the hints. It can be done in teams or pairs inculcating team work. Useful to remember definitions and terms.

Basic Electrical Engineering
Activity: Technical Crossword
Topic: Induction Motor – Date: 3rd Dec 2019

No. of Teams: 1

Preparation / Prerequisites:
Announced the topic in the class on 30th Nov' 2019. Students were asked to come prepared with proper material / information. Basic information provided in the class.

Rules Executed

- Formed the teams randomly and given 10 minutes time to discuss among team members.
- Teams were given choice of topics. They selected the topics based on their interest.
- Topics should not be repeated.
- The definitions/hints and answers used should be accurate.
- Experiment with a variety of layouts to determine the most effective ones.

Team: Ms P. Revathi, Ms. K. Deekshitha, Ms. B. Sai Likitha, Ms. S. Sravani & Ms. V. Bhargavi
Marks: 8/10

Marks are awarded based on the accuracy of the hints and answers. The mistakes were intimated and corrected. The puzzle with accurate hints is made again.

Name of the Activity: Modern Tool Usage

Subject Name: Power System Analysis
Faculty Name: Mr. M Rupesh
Topic: Y Bus formation and Load flow studies
Date of Conduction: 14th February 2020
Class / Year / Semester: III EEE / 2019-20 / II Semester

Brief Write-up

Modern Tool usage is one of the best practical approach activity using core software's. In this activity the concept of Y-Bus formation using singular transformation method and direct inspection method were taught in class and assignment is given to calculate the Y-bus matrix and analyze the load flow studies for the given system using Gauss-Seidel method theoretically and compare the same by using MATLAB coding and Power world simulator software to analyze how the load flow is taking place in practical scenario.

The above activity improves the knowledge of software's available in core subject with improvement in subject with practical exposure.

Name of the Activity: Moodle- Quiz

Subject Name: Wind, Solar and Hybrid Energy Systems
Faculty Name: Ms.B.Sujatha
Topic: Solar Thermal Power Generation
Date of Conduction: 1st May 2020
Class / Year / Semester: IV EEE / 2019-2020 / II Semester

Brief Write-up

Moodle is one of the Learning Management System (LMS) where we can incorporate required additional tools which are used for teaching learning activities. Quiz is one of the powerful tool to monitor and diagnose the student performance with certain types of knowledge. This tool effectively can boost your course's effectiveness, and promote student performance. The quiz is scheduled in the Moodle with time limits and informed the same who students who were added in the Moodle course and the quiz is consisting of Multiple-choice questions with easy, moderate and hard levels.

The advantages of Online Quiz in Moodle are as follows.

1. Students can be engaged remotely in an attractive mode
2. At the same time large number of students can take the test.
3. The questions and options are randomized.
4. Results and summary of quiz with correct options can be displayed immediately after completing the quiz.
5. Faculty can analyze the students understanding levels with the results immediately.
